Installation Instructions – 5.0L Coyote Conversion to Fox Body Mustang

Engine Mount

1. The SHM-1711 Engine Mount kit comes with left and right motor mount, spacers and hardware used to install 5.0L Coyote motor into your Fox Body Mustang.

The longer spacers go to the passenger side along with the right side RH Motor Mount.
The shorter spacers go on the driver side along with the left side LH Motor Mount.

2. Line the right side RH motor mount to the mount holes on the Passenger side and install the RH mount and three longer spacer with the hardware supplied.

3. Tighten the three bolts to 55Nm (41 lb-ft) torque.
